Kalsep UK Ltd. and Smith & Loveless Ltd. Join Up For Water, Sewerage & Waste Exhibitions 2014

CAMBERLEY, SURREY – Smith & Loveless Ltd and Kalsep UK Ltd have combined forces to exhibit a comprehensive range of water and waste water treatment systems at this year's [Water, Sewerage & Waste](#) shows.

With over 80 years combined experience in the water and wastewater industries worldwide, both Smith & Loveless Ltd and Kalsep UK Ltd share a similar ethos in quality and high levels of customer care. This relationship is an opportunity to develop even closer links with the UK water companies and offer a higher level of commitment and service to this important market sector.

Some of our products being displayed include:

- The **Wet Well Mounted Pump Station** offering a much safer and more economical alternative to existing submersible pumps in sewerage systems and proves the company's commitment to minimising life-cycle costs.
- **FIBROTEX®**, the compact, fully automatic, self-cleaning fibrous depth filter, designed to eliminate or reduce particulates in aqueous feedstreams using a choice of water sources including boreholes, rivers & canals, minimising the consumption of costly mains water.
- The **PISTA®** grit removal systems delivering great removal efficiencies along with additional design cost saving benefits.
- **TITAN MBR™** providing superior effluent quality/water reuse and the lowest MBR operational costs.

If you would like to discuss how these and other products could support and benefit your current projects or particular applications, come and meet us on **Stand 12** at the Holiday Inn, The Coldra, Newport NP182Y on 10 April 2014.

[Register here.](#)

Also exhibiting at Warrington, Gatwick and Durham later this year.
